Laboratories, Inc.

Chemical Management Systems

**Lockable...
Flexible...
now you
can have
it ALL!**

The new FLEX-LOCK™ Dilution System from National Chemical Laboratories offers you all of the “no chemical contact” advantages of our Twin Power™ Dispensing System in a lockable unit for added security. Fills both bucket fill and spray & wipe application products from the same SKU, saving valuable inventory space!

Flex-Lock™
DILUTION SYSTEM

The FLEX-LOCK™ unit offers these outstanding features:

- Equipped with our exclusive ES-Gap eductor (meets ASSE 1055-B standards) for flawless backflow prevention.
- Convenient remote fill “gas-pump” handle makes filling buckets and auto-scrubbers easy and accurate.
- Soda-fountain style bottle fill is activated simply with one hand; no buttons to push
- Built-In Drip Tray to catch excess solution, reducing the chance of slip/fall accidents near the unit
- Designed for use with all NCL TWIN POWER™ Super Concentrates

Simply attach the cap to the TWIN POWER™ bottle; the dilution control tips are sealed in the bottle with no chemical contact! You select the flow rate on the mating cap for pinpoint accuracy in solution dispensing.
