

The way you look at chemical management is about to change...

FOR GOOD!

Combines dispensing simplicity with maximum cleaning performance.

The TWIN POWER™ Chemical Management System from NCL provides peak cleaning efficiency in an environmentally responsible program. Using super concentrated formulations (3-4 times higher than traditional strength products), TWIN POWER Dispensing products deliver highly active in-use dilution cleaners that perform the toughest of tasks!

You also gain exceptional control over your cleaning costs...safely! The unique TWIN POWER insert dilutes either spray & wipe or mop & bucket applications from the same container with **no chemical contact**. With 18 high performance products available, the TWIN POWER program is the most comprehensive chemical management system available today!

Unique bottle design with dual flow stem allows for filling of both high and low flow products from the same bottle, saving time and inventory space!

The TWIN POWER Chemical Management System features:

- Field-proven, true Super Concentrates for maximum cleaning performance
- Ultimate cleaning efficiency at pre-set dilution ratios for total cost control
- Universal fragrance with our exclusive Sienna™ cosmetic grade scent in many products
- Bi-lingual concentrate and secondary labels, with icons for easy product identification
- Environmentally Responsible formulas that contain no harsh solvents (such as Butyl Cellulosol) or phosphates and are completely biodegradable (noted products also carry Green Seal Certification)
- Super concentrated formulas reduce amount of packaging required; promotes source reduction
- Elimination of waste associated with inaccurate dilutions promotes a cleaner environment

EQUIPMENT PRODUCTS

Flex-Lock™ DILUTION SYSTEM

The new FLEX-LOCK II™ Dilution System from National Chemical Laboratories offers you all of the “no chemical contact” advantages of our Twin Power™ Dispensing System in a lockable unit for added security. Fills both bucket fill and spray & wipe application products from the same SKU, saving valuable inventory space!

#4150

TWIN POWER

Modular Chemical Dispensing Unit

This marvel in dispensing efficiency offers you our exclusive ES-Gap™ Eductor, which provides complete backflow prevention and broad regulatory acceptance. Unique cartridge design offers dual flow and dilution control from the same super concentrate container with no chemical carryover.

- No chemical contact for added worker safety
- An easy-to-install unit with space saving design
- Locking high flow button enables you to fill mop buckets or automatic scrubbers easily and quickly.

#4110

PORTA-POWER™ Portable Chemical Dispensing Unit

Fills both spray bottles and buckets from the same chemical super concentrate container, saving time and inventory costs. Convenient trigger style handle with quick release button makes filling containers easy, with accurate dispensing first time, every time. The PORTA-POWER™ can be easily carried on a janitorial service cart or utility cart, and can connect to any standard water source quickly, easily!

#4115

HANDI-HOLD™

Locking Storage Rack

Holds up to six TWIN POWER Super Concentrate chemical containers. Mounting hardware included and unit installs easily, providing a safe and convenient way to store products.
