Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

General Information
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

Section 5 - Fire-fighting measures

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
### Section 6 - Accidental release measures

| **Personal precautions, protective equipment and emergency procedures.** | Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. For personal protection, see section 8 of the SDS. |
| **Methods and materials for containment and cleaning up.** | This product is miscible in water. SMALL SPILLS Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. LARGE SPILLS: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Prevent entry into waterways, sewer, basements or confined areas. Following product recovery, flush area with water. Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. |
| **Environmental precautions.** | Avoid discharge into drains, water courses or onto the ground. |

### Section 7 - Handling and storage

| **Precautions for safe handling.** | Observe good industrial hygiene practices. |
| **Conditions for safe storage, including any incompatibilities.** | Store in original tightly closed container. Store away from incompatible materials (see Section 10 of the SDS). |

### Section 8 - Exposure control/personal protection

| **Occupational exposure limits.** | No exposure limits noted for ingredient(s). |
| **Biological limit values.** | No biological exposure limits noted for the ingredient(s). |
| **Appropriate engineering controls.** | Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station. |
| **Individual protection measures, such as personal protective equipment.** | If use of product risks exposure to contact, wear safety glasses with side shields. |
| **Eye/face protection.** | Impervious gloves are recommended for prolonged use. |
| **Skin protection.** | If use of product risk exposure to contact, wear suitable protective clothing. |
| **Hand protection.** | In case of insufficient ventilation, wear suitable respiratory equipment. |
| **Respiratory protection.** | Wear appropriate thermal protective clothing, when necessary. |
| **Thermal hazards.** | Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. |
