### **DIRECTIONS FOR USE**

## SCRUB/RE-COAT USING STANDARD 175 RPM FLOOR MACHINE:

Dilute SURFACE PREP™ in a mop bucket at a dilution ratio of 1:6 to 1:10, depending upon build-up. Liberally mop solution onto floor surface and allow to dwell for 1 to 4 minutes (depending on how aggressive it is desired to scrub). With machine and appropriate floor pad or brush, scrub surface of floor until all embedded soils and scuffs are removed. After scrubbing, remove solution from floor with wet-dry vacuum or a clean mop. Damp mop rinse with clear water to remove any excess residue. Allow floor to completely dry prior to applying new coating.

Liberally mop solution onto floor surface and allow to dwell for 1 to 4 minutes (depending on how aggressive it is desired to scrub). Fill auto scrubber with clear water, mount appropriate floor pad or medium grade brush. With vacuum off and squeegee up, scrub the floor until all embedded soils and scuffs are removed.
