

Lockable... Flexible...

Dilution Control... *TIMES 2 !!*

The new **FLEX-LOCK 2™ Dilution System** from National Chemical Laboratories offers you all of the “no chemical contact” advantages of our Twin Power™ Dispensing System in a lockable unit for added security. Fills both bucket and spray and wipe application products from the Same SKU, saving valuable inventory space!

Simply attach the cap to the TWIN POWER™ bottle; the dilution control tips are sealed in the bottle with no chemical contact! You select the flow rate on the mating cap for pinpoint accuracy in solution dispensing.

The **FLEX-LOCK 2™** unit offers these outstanding features:

- Standard dispensing configuration: 1 Bucket fill (high flow), and 3 Quart fill (low flow)
- Completely enclosed, locking cabinets.
- Compact design takes up little wall space.
- Equipped with our exclusive ES-Gap educator (meets ASSE 1055-B standards) for flawless backflow prevention.
- Designed for use with all NCL TWIN POWER™ Super Concentrates
- No chemical contact required, added worker safety and convenience.

PORTA-POWER™ Portable Chemical Dispensing Unit

Fills both spray bottles and buckets from the same chemical super concentrate container, saving time and inventory costs. Convenient trigger style handle with quick release button makes filling containers easy, with accurate dispensing first time, every time. The PORTA-POWER™ can be easily carried on a janitorial service cart or utility cart, and can connect to any standard water source quickly, easily!

HANDI-HOLD™ Locking Storage Rack

Holds up to six TWIN POWER Super Concentrate chemical containers. Mounting hardware included and unit installs easily, providing a safe and convenient way to store products.
